Latex Diary system created by me during Covid times. Hope you like it.

- **TODO: Google Calender Integration**
- **TODO: LLM integration**

- **Tex Save**: Saves entries in Tex and Plaintext which can be edited manually
- **Date-based Entry System**: Create entries for today or any past date
- **Chronological Organization**: Entries are automatically sorted and organized by year and month
- **LaTeX Output**: Beautiful PDF generation with consistent formatting
- **Mood Tracking**: Include emojis to represent your mood/feeling for each entry
- **Flexible Content Boxes**: Add optional content in colored boxes for highlighting important information
- **Entry Appending**: Add content to existing entries for the same date
- **Automatic Compilation**: Automatically generates a complete LaTeX document with all entries
